Submersible Sump Pumps

▲ Features

- Dry motor with overload protector; Cable with an epoxy resin sealed water-proof cable hood; Use deep groove C3 bearing to extend life time.
- Superior abrasion resistant double mechanical seal Rainwater effluent, accumulated water drainage to ensure best seal effect.
- Oil seal mounted outside of seal chamber stops solids gathering around seal faces.
- Equipped with SUS304 strainer to prevent impeller from being blocked or damaged by sewage or solids.

▲ Motor Spec.

• 2P dry type motor. • Insulation: F class. • Protection: IP68. Frequency: 50HZ.

Voltage:1ø220~240V(0.5~2HP).

3ø220~440V(all models). EA Volute Impeller

▲ Applications

- Wastewater, sump drainage from basement of buildings, hotels, schools, restaurants, malls, subway, construction site, public places..etc.
- ,flood control, water circulation of aquaculture and landscape ponds..etc.

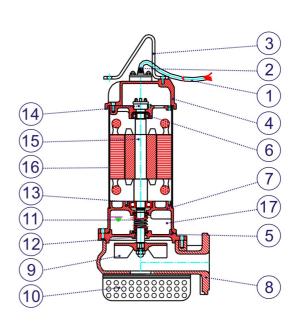

Parts and Materials List

		Standard Material								
No.	Parts	EA Model								
1	Cable	UL_STOW								
2	Cable hood	PVC								
3	Handle	Nylon6 or SS400								
4	Motor cover	Nylon66 or FC200								
5	Seal housing	FC200								
6	Bracket	FC200								
7	Oil chamber	FC200								
8	Pump casing	FC200								
9	Impeller	FC200								
10	Strainer	SUS304								
11	Mech. seal	CA/CE								
12	Oil seal	NBR								
13	Bearing	(NTN brand)								
14	Overload protector	(T.I.brand)								
15	Shaft	SUS410								
16	Motor housing	SUS304								
17	Lubricant oil	(Turbine Oil ISO VG46)								

Mech.seal (sic/sic)material is available upon request.

EA-series 50HZ

Submersible Sump Pumps

Operating Conditions

Water temperature: 0~40°C.
 Ambient temperature: 0~40°C.
 Solid passage: 6MM.

Operating water depth: Max.8~10M.

• No use in sea water and high-corrosive liquids.

• No 24hrs continuously running.

▲ Performance Curves

▲ Model Code

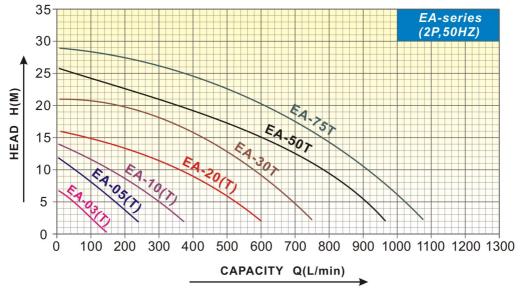

EA - 20 (A) (T)

Three Phase Motor

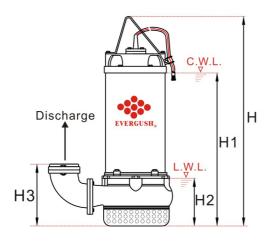

Equipped with auto float switch

HP: Number/10

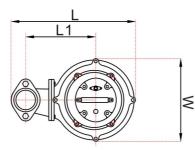

Model name of sub. sump pump

▲ Specification & Dimension

NOTE: Forbid running submersible pumps continously under L.W.L.

C.W.L.: Continously Running Water Level. L.W.L.: Lowest Running Water Level.

Remarks: •(A): Equipped with automatic float switch. •(T): Three phase motor. •10M cable are available for all models per special request.

EA Submersible Sump Pump with Guide Rail Device

Product Features

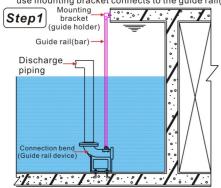

Through simple and convenient installation, we can connect the pump onto guide rail device. Whenever the pump needs maintenance, it can be easily pulled out through guide bar to dismantle, repair or examine the pump. For safety purpose, The workers no longer need to go down the septic tank to do maintenance. It will greatly reduce down time.

Applications

 Animal husbandry and dairying septic tank waste water drainage; sewers, apartments, buildings and basements sewage treatment equipment drainage; Dye house, fur and leather industry and steel industry waste water drainage; other waste water treatments drainage.

🚄 Installation Diagram

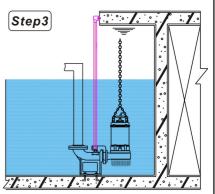

Guide rail device should connect to discharge pipeline. It should be firmly fixed to the bottom. After that, you should use mounting bracket connects to the guide rail(bar). Mounting_ bracket (guide holder)

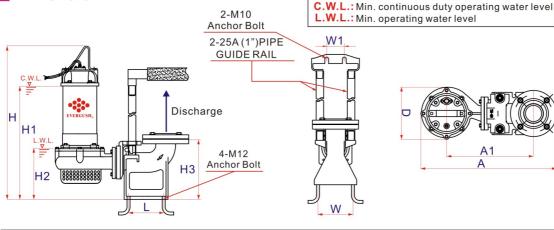

The hook should connect to the pump. After that, you should use the chain to slowly slide it down through guide rail(bar).

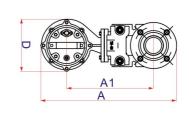

The pump will slide down through guide bar until it connects to guide rail device tightly.
